## TP4 - MongoDB, CRUD & Aggregations

### I. Opérations CRUD

**II.1** Importer le fichier piscines\_paris.json dans une base paris dans une collection piscines. (voir mongoimport)

**mongoimport --db paris --collection piscines --file ./piscines\_paris.json**

```
pierre@Pierre:advanced_database/tp3 (master)$ mongoimport --db paris --collection piscines --file ./piscines_paris.json
2019-10-09T09:15:03.865+0200    connected to: mongodb://localhost/
2019-10-09T09:15:03.879+0200    31 document(s) imported successfully. 0 document(s) failed to import.
```

// Dans la collection "piscines" de la base "paris", trouver en utilisant les opérateurs de requête

**use paris**

**db.piscines.find()**

```
> use paris
switched to db paris
> db.piscines.find()
